SUBJECT INDEX

1968, Volume 30

"A" wave of the apex cardiogram in aortic valve disease and cardiomyopathy (Epstein *et al.*). 591, 870, *P.*

Acidosis, metabolic, and cardiac dysrhythmias in acute myocardial infarction (Anderson *et al.*) 493

Adder bite, abnormal electrocardiogram after: case report (Chadha *et al.*). 138

Adenoids, large, and large tonsils, in small children with cor pulmonale (Ainger). 356

Adrenaline sulphate, intravenous, haemodynamic effects following aortic valvar homograft replacement (Fordham *et al.*). 350

Air travel, cardiovascular disease (Beighton & Richards). 367

Altitude, high, effect on heart: editorial (Jackson). 291

Amyloidosis, cardiac, primary, electron microscopy of the heart in (Husband & Lannigan). 265

Anaemia, chronic severe, circulatory haemodynamics after blood transfusion (Sanghvi *et al.*). 125

Anastomosis, extracardiac, in coronary ostial occlusion: case report (Sanerkin). 440

Aneurysm, dissecting, of aorta, due to giant cell arteritis (Harris). 840

— formation, possible relationship to survival of myocardial infarction, radiological abnormalities (Groden & James). 236

— subclavian artery, and idiopathic cystic medionecrosis: case report (Persaud). 436

— ventricular, clinical diagnosis and prognosis (Mourdjinis *et al.*). 497

Angina pectoris, acute effect of nitroglycerin on haemodynamics (Arborelius *et al.*). 407

— — mode of action of nitroglycerin (Robinson). 295

— — use of atrial pacing to evaluate drugs (Balcon *et al.*). 870, *P.*

Angiocardiographic method, left ventricular volume in aortic stenosis measured by, and by thermodilution method (Fleming & Hamer). 475

Angiocardiography, left ventricular, in atrioventricular defects (Somerville & Jefferson). 446

Angiography, haemodynamic changes following (Brown *et al.*). 872, *P.*

Anticoagulant treatment in coronary heart disease (Royston). 817

Aorta, abdominal, coarctation, endocardial fibro-elastosis, and mitral incompetence, report of three sibs (Hallidie-Smith & Olsen). 850

Aortitis, chronic, with cardiac anastomosis in coronary ostial occlusion (Sanerkin). 440

Aortography in Fallot's tetralogy and allied lesions (Rees & Somerville). 423, *P.*

Apex cardiogram, "A" wave, in aortic valve disease and cardiomyopathy (Epstein *et al.*). 591, 870, *P.*

Appendages, atrial, juxtaposition, a sign of severe cyanotic heart disease (Melhuish & Van Praagh). 269

Arch, aortic, absent sixth: a form of pulmonary atresia (Stuckey *et al*). 258

— — double, associated with complete transposition of the great vessels: case report (Higashino & Ruttenberg). 579

— — right, associated with congenital subclavian steal syndrome (Maranhao *et al.*). 875

Arcus senilis and coronary heart disease (Hickey *et al.*). 426, *P.*

Arrest, elective, circulatory, with continuous coronary perfusion during neurosurgical operations (Davison *et al.*). 705

Arrhythmia(s), atrial, factors affecting cardioversion with special reference to quinidine (Hall & Wood). 84

— — and long-term results of DC reversion (Radford & Evans). 91

— — right electrocardiograms in analysis of, following acute myocardial infarction (Jewitt *et al.*). 97, 426, *P.*

— cardiac, tuberous sclerosis presenting as: case report (Taylor). 132

— following acute myocardial infarction, lignocaine in management (Jewitt *et al.*). 427, *P.*

— intractable, management with pacemakers, patients without heart block (Sowton). 420, *P.*

Artery(ies) lower limb, reconstructive surgery, use of electromagnetic flowmeter as a monitor of blood flow in first 24 hours (Renwick *et al.*). 422, *P.*

— pulmonary, left aberrant, two cases, differential diagnosis from respiratory obstruction in infancy (Tan *et al.*). 110

Arteriography, coronary, selective, importance in differential diagnosis of anginal complaints (Bruschke). 427, *P.*

Arteritis, giant cell, causing dissecting aneurysm of the aorta (Harris). 840

Atrial function after electrical conversion to sinus rhythm (Ikram *et al.*). 80

— *see also* Septal defects

Atresia, mitral, congenital, clinical and pathological features of 9 cases (Summerell *et al.*). 249

— pulmonary, and absent sixth aortic arch (Stuckey *et al.*). 258

Atrioventricular defects, *see* Septal defects, atrioventricular

— dissociation with intact retrograde conduction (Fletcher & Morton). 458

Beats, ventricular ectopic, splitting of second heart sound in (Oriol *et al.*). 757

Bendrofluazide, in hypertension in pregnancy (Baker *et al.*). 871, *P.*

Block, atrioventricular, complete, electrocardiographic findings (Lopez). 20

— bundle-branch, aetiology (Mulcahy). 34

— — — complete, chronic left, phonocardiography and mechanocardiography, 30 cases (Baragan *et al.*). 196

— — — right, with left axis deviation, in ventricular septal defect before and after surgical closure (Kulbertus *et al.*). 422, *P.*

— heart, complete, and artificial pacemakers, causes of death in patients with (Harris *et al.*). 14

Blockade, beta-adrenergic, effects of, during exercise in hypertension and ischaemic heart disease (Shinebourne *et al.*). 424, *P.*
— — — haemodynamic effects (Aström). 44
— — — in organic heart disease, cardio-circulatory effects: comparison between propranolol and CIBA 39,089-Ba (Grandjean & Rivier). 50

—, guanethidine-resistant, management (Sandler). 419, *P.*
— in pregnancy, controlled trial of hypotensive agents in (Baker *et al.*). 871, *P.*
— pulmonary, with hepatic cirrhosis: case report (Segel *et al.*). 575
— — and portal venous system thrombosis, haemodynamic changes and radiological findings case report (Lal & Fletcher). 723
— — primary, cerebrovascular malformation and lymphoedema feet in a family (Avasthey & Roy). 769
— — — familial (Hood *et al.*). 336
— — second heart sound in (Sutton *et al.*). 743
— retinal artery changes correlated with other hypertensive parameters in a coronary heart disease case-history study (O'Sullivan *et al.*). 556
— ventricular, left, vectorcardiographic evolution (Bell *et al.*). 70
— — physiological basis for recognizing in the vectorcardiogram (Arntzenius). 421, *P.*
— — right, from chronic bronchitis, electrocardiography and vectorcardiography (Brown). 470
Hypothermia, profound, surgical correction of ostium primum using (Anderson *et al.*). 422, *P.*
Hypovolaemia, relative, as a cause of shock associated with acute myocardial infarction, incidence and significance (Allen *et al.*). 426, *P.*

I.C.I. 50172, use in supraventricular tachycardia (Gibson & Sowton). 873, *P.*

India, studies in blood coagulation, diet, and ischaemic heart disease in two population groups (Malhotra). 303
Infarction, cardiac, abnormal platelet behaviour in (Bolton *et al.*). 426, *P.*
— — free noradrenaline in plasma of patients after (Bray *et al.*). 874, *P.*
— myocardial, alteration in intensity of heart sounds after (Price & Brown). 835
— — acute, arrhythmias following, use of lignocaine (Jewitt *et al.*). 427, *P.*
— — — haematocrit changes (Sedziwy *et al.*). 344
— — — haemodynamic effects following digitalization (Balcon *et al.*). 373, 427, *P.*
— — — pacemaking in complete heart block complicating (Lassers *et al.*). 425, *P.*
— — — relation between metabolic acidosis and cardiac dysrhythmias in (Anderson *et al.*). 493
— — — relative hypovolaemia as a cause of shock associated with, incidence and significance (Allen *et al.*). 426, *P.*
— — — right atrial electrocardiogram in the analysis of arrhythmias following (Jewitt *et al.*). 97, 426, *P.*
— — — treatment of AV conduction disturbance by artificial pacemaking (Sutton). 427, *P.*
— — anticoagulant treatment (Royston). 817
— — blood volume changes in (Clarke *et al.*). 870, *P.*
— — high lateral, electrocardiographic triad (Fletcher *et al.*). 870, *P.*
— — in intracerebral haemorrhage and cerebral thrombosis, electrocardiographic abnormalities simulating: case report (Ashby & Chadha). 732
— — physical training of patients after (Pool *et al.*). 426, *P.*
— — radiological abnormalities in patients who have survived a myocardial infarction, possible relationship to aneurysm formation (Groden & James). 236
Insufficiency, aortic, frequency analysis of heart murmurs applied to detection (Schlesinger *et al.*). 423, *P.*
Interval-contractility relationship during random stimulation of isolated rat heart, computer analysis (Meijler *et al.*). 425, *P.*
Ischaemic heart disease and ABO blood groups in men (Allan & Dawson). 377
— — — blood coagulation and diet in two population groups in India (Malhotra). 303
— — — effects of beta-adrenergic blockade during exercise in (Shinebourne *et al.*). 424, *P.*
— — — and smoking (Oram). 145
Isoprenaline, haemodynamic effects following aortic valve homograft replacement (Resnekov *et al.*). 38
— and propranolol, effect on calcium uptake of sarcoplasmic reticulum from dog's heart (Hess *et al.*). 872, *P.*
Isopropylnoradrenaline sulphate, *see* Isoprenaline

Leiomyosarcoma, cardiac, primary or secondary? case report (Nicol & McAndrew). 432
— of the inferior vena cava propagating into the right atrium: case report (Deutsch *et al.*). 571
Lignocaine in management of arrhythmias following acute myocardial infarction (Jewitt *et al.*). 427, *P.*
Lipidosis, cardiac, isolated; case report (Ross & Belton). 726
Lipoprotein lipase, plasma, handling by heart and lungs (Muir). 871, *P.*
Loops, QRS, in hypertrophic obstructive cardiomyopathy (Coyne). 546
Lung capillary blood flow, some hydrodynamic factors affecting (Karatzas & Lee). 425, *P.*
Lymphoedema feet, primary pulmonary hypertension, and cerebrovascular malformation in a family (Avasthey & Roy). 769

Malnutrition, associated with congestive cardiac failure, cardiomegaly, hepatomegaly and portal fibrosis in Ceylon (Obeyesekere). 226
Medionecrosis, idiopathic cystic, and subclavian artery aneurysm: case report (Persaud). 436
Metastases, myocardial, a pathological and electrocardiographic study (Berge & Sievers). 383
Methyldopa in hypertension in pregnancy (Baker *et al.*). 871, *P.*
Murmurs, heart, frequency analysis of, applied to detection of aortic insufficiency (Schlesinger *et al.*). 423, *P.*
— systolic, and cardiac pathology, in the elderly (Pomerance). 687
— — late and non-ejection ("mid-late") systolic clicks, analysis of 90 patients (Barlow *et al.*). 203
Myocardium, metastases, a pathological and electrocardiographic study (Berge & Sievers). 383
— normal and diseased vascular pattern. I. Normal pattern in the left ventricular wall (Farrer-Brown). 527
II. Pattern seen with fibrosis of the left ventricular free wall (Farrer-Brown). 537
— vascular pattern of right ventricle of human heart (Farrer-Brown). 679

Necropsy study of endomyocardial fibrosis and rheumatic heart disease in Uganda 1950–1965 (Shaper *et al.*). 391
Neurosurgical operations, elective circulatory arrest with continuous coronary perfusion during (Davison *et al.*). 705
Nitroglycerin, acute effect on haemodynamics of angina pectoris (Arborelius *et al.*). 407
— mode of action in angina pectoris (Robinson). 295
— in patients with mitral valvular disease, haemodynamic effects (Christensson *et al.*). 822
Noradrenaline, free, in plasma of patients after cardiac infarction (Bray *et al.*). 874, *P.*

Occlusion, coronary ostial, extracardiac anastomosis in: case report (Sanerkin). 440
Ostium primum defects, surgical correction using profound hypothermia (Anderson *et al.*). 422, *P.*

Pacemakers, artificial, and complete heart block, causes of death in patients with (Harris *et al.*). 14
— cardiac, implantable; editorial (Sowton). 587
— demand, implantable (Castellanos *et al.*). 29
— treatment of patients without heart block: a new approach to the management of intractable arrhythmias (Sowton). 420, *P.*
— ventricular-triggered: clinical experience (Sowton). 363
Pacemaking, artificial, treatment of AV conduction disturbance in acute myocardial infarction by (Sutton). 427, *P.*
— in complete heart block complicating acute myocardial infarction (Lassers *et al.*). 425, *P.*
Pacing, atrial, use to evaluate drugs in angina pectoris (Balcon *et al.*). 870, *P.*
Pathology, cardiac, and systolic murmurs in the elderly (Pomerance). 687
Perfusion, coronary continuous, and elective circulatory arrest, during neurosurgical operations (Davison *et al.*). 705
Pericarditis, constrictive, comparison with severe endomyocardial fibrosis of right ventricle, haemodynamic features (Somers *et al.*). 322
Phonocardiographic findings in persistent truncus arteriosus (Victorica *et al.*). 812

"Pigtail loops" in hypertrophic obstructive cardiomyopathy (Coyne). 546
Plasma levels and tissue distribution of ^{3}H-digoxin (Binnion & Morgan). 871, *P.*
Platelets, abnormal behaviour in patients with cardiac infarction (Bolton *et al.*). 426, *P.*
Pregnancy, hypertension in, controlled trial of hypotensive agents (Baker *et al.*). 871, *P.*
— importance of accurate cardiac diagnosis (Marquis). 421, *P.*
Pressure, right ventricular, Frank vectorcardiogram related to (Fletcher *et al.*). 421, *P.*
Proceedings, British Cardiac Society, 419, 869
Propranolol and CIBA 39,089-Ba, comparison in organic heart disease (Grandjean & Rivier). 50
— and isoprenaline, effect on calcium uptake of sarcoplasmic reticulum from dog's heart (Hess *et al.*). 872, *P.*
— part played by bradycardia in action of (Hamer *et al.*). 873, *P.*
Prostheses, *see* Valve, mitral; Valve, ball
Pulses, peripheral, observer variability in recording (Meade *et al.*). 661
Puncture, ventricular, direct, left heart catheterization by (Semple *et al.*). 402

Quadricuspid pulmonary valve, congenital, five cases (Enoch). 67
Quinidine, and factors affecting cardioversion of atrial arrhythmias (Hall & Wood). 84

Regurgitation, aortic, significance after homograft replacement of (McDonald *et al.*). 873, *P.*
— mitral, endocardial fibro-elastosis, and coarctation of abdominal aorta, report of three sibs (Hallidie-Smith & Olsen). 850
Resistance, pulmonary, site in cor pulmonale in chronic bronchitis (Herles *et al.*). 654
Respiratory disease, in a working population, electrocardiographic patterns (Prineas *et al.*). 859
— muscles, electromyogram of, registered in the ordinary electrocardiogram (Fleischmann & Bar-Khayim). 242
Retinal artery changes correlated with other hypertensive parameters in a coronary heart disease case-history study (O'Sullivan *et al.*). 556
Rheumatic carditis, acute, rupture of chordae tendineae during: case report (Hwang & Lam). 429
— heart disease and endomyocardial fibrosis in Uganda 1950–1965, necropsy study (Shaper *et al.*). 391

Sarcoplasmic reticulum, calcium uptake of, from dog's heart, effect of isoprenaline and propranolol (Hess *et al.*). 872, *P.*
Septal defect(s), atrial, ostium primum, electrocardiographic correlation of anatomical and haemodynamic data in (Kulbertus *et al.*). 464
— — — in patients over 45 years of age. Merits of surgical versus medical therapy (Wolf *et al.*). 115
— — atrioventricular, left ventricular angiocardiography in (Somerville & Jefferson). 446
— — — a study of 92 families (Emanuel *et al.*). 645
— — ventricular, repair in childhood (Coleman *et al.*). 845
— — — before and after surgical closure, left axis deviation with right bundle-branch block in (Kulbertus *et al.*). 422, *P.*
Shock, DC, long-term results in atrial fibrillation (Radford & Evans). 91
— — *see also* Cardioversion: Electroconversion
— relative hypovolaemia causing, in association with acute myocardial infarction, incidence and significance (Allen *et al.*). 426, *P.*
Shunts, intracardiac, use of hydrogen in detection (Robinson *et al.*). 168
Sinus rhythm, left atrial function after electrical conversion to sinus rhythm (Ikram *et al.*). 80
Situs inversus with cor triloculare biatriatum and a single arterial trunk; case report (Stock & Giles). 141
Smoking, and ischaemic heart disease: editorial (Oram). 145
Snake bite, adder, abnormal electrocardiogram after: case report (Chadha *et al.*). 138
Sound(s), heart, intensity, alteration after myocardial infarction (Price & Brown). 835
— — second, in normal subjects (Harris & Sutton). 739
— — — in pulmonary hypertension (Sutton *et al.*). 743
— — — splitting, in ventricular ectopic beats (Oriol *et al.*). 757
— — third, left ventricular, mode of production (Fleming). 873, *P.*
Splitting of second heart sound in ventricular ectopic beats (Oriol *et al.*). 757
Stenosis, aortic, calcified, and congenital bicuspid aortic valves (Campbell). 606
— — congenital, natural history (Campbell). 514
— — left ventricular volume in, measured by an angiocardiographic and thermodilution method (Gleming & Hamer). 475
— mitral, left heart haemodynamics at rest and during exercise in patients with (Kasalický *et al.*). 188
— pulmonary, acquired, clinical and radiological features (Seymour *et al.*). 776
— — in first year of life, assessment of operative results of 26 infants (Mustard *et al.*). 255
— — isolated, haemodynamic effects of exercise in, before and after surgery (Jonsson & Lee). 60
Stimulation, paired, electrophysiological aspects (van Dam). 420, *P.*
Subclavian steal syndrome, congenital, associated with right aortic arch (Maranhao *et al.*). 875

Tachycardia, supraventricular, clinical use of I.C.I. 50172 (Gibson & Sowton). 873, *P.*
Tetralogy of Fallot, *see* Fallot's tetralogy
Thermodilution technique(s), left ventricular volume in aortic stenosis measured by angiocardiographic method and (Fleming & Hamer). 475
— — measurement of right ventricular end-systolic and end-diastolic volumes by (Balcon & Oram). 690
Thrombosis, cerebral, and intracerebral haemorrhage, electrocardiographic abnormalities in myocardial infarction simulating: case report (Ashby & Chadha). 732
— in coronary heart disease (McDonald). 151
— portal venous system, and pulmonary hypertension, haemodynamic changes and radiological findings: case report (Lal & Fletcher). 723
Tissue distribution and plasma levels of ^{3}H-digoxin (Binnion & Morgan). 871, *P.*
Tonsils, large, and large adenoids, in small children with cor pulmonale (Ainger). 356
Transplants, heart, statement on policy (International Society of Cardiology. 878
Transposition of great vessels, anatomical aspects (Lubkiewicz & Jones). 872, *P.*
— — — case report with double aortic arch (Higashino *et al.*). 579
Truncus arteriosus, persistent, phonocardiographic findings (Victorica *et al.*). 812
Trunk, single arterial, situs inversus with cor triloculare biatriatum and: case report (Stock & Giles). 141
Tuberous sclerosis presenting as cardiac arrhythmia: case report (Taylor). 132

Uganda 1950–1965, necropsy study of endomyocardial fibrosis and rheumatic heart disease (Shaper *et al.*). 391
Ultrasonics in cardiac diagnosis (Pridie *et al.*). 420, *P.*
— patterns in mitral valve disease (Wharton). 421, *P.*

Valve(s), aortic, bicuspid, congenital, and calcified aortic stenosis (Campbell). 606
— — disease, and cardiomyopathy, "A" wave of the apex cardiogram in (Epstein *et al.*). 591, 870, *P.*
— — homograft replacement, changes in chest radiograph after (Gotsman *et al.*). 219
— — — — haemodynamic effects of intravenous adrenaline sulphate following (Fordham *et al.*). 350
— — — — haemodynamic effects of isoprenaline following (Resnekov *et al.*). 38
— — — — significance of aortic regurgitation after (McDonald *et al.*). 873, *P.*
— — — — in Wolff-Parkinson-White syndrome: case report (Richmond & Smith). 582
— ball, prostheses, chronic haemolysis following insertion (Yacoub & Keeling). 676
— mitral, disease, nitroglycerin in, haemodynamic effects (Christensson *et al.*). 822
— — — ultrasonic patterns (Wharton). 421, *P.*
— — prosthesis, Hammersmith, mechanical performance (Raftery *et al.*). 666
— — replacement with aortic heterografts, clinical results (Wooler & Ionescu). 420, *P.*
— pulmonary, quadricuspid, five cases (Enoch). 67
Vectorcardiogram, Frank, in normal men, derived from visual and manual measurement of 300 records (Lyon & Belletti). 172
— — related to right ventricular pressure (Fletcher *et al.*). 421, *P.*
— physiological basis for recognizing ventricular hypertrophy in (Arntzenius). 421, *P.*
Vectorcardiographic evolution in left ventricular hypertrophy (Bell *et al.*). 70
Vectorcardiography, examination of the validity of the concept of: editorial (Skowron). 735
Venocavography, in diagnosis of leiomyosarcoma on inferior vena cava: case report (Deutsch *et al.*). 571
Ventricle, left, free wall, normal pattern. Part I of Normal and diseased vascular pattern of myocardium of human heart. (Farrer-Brown). 527
— — — — pattern seen with fibrosis of. Part II of Normal and diseased vascular pattern of myocardium of human heart (Farrer-Brown). 537
— — third heart sound, mode of production (Fleming). 873, *P.*
— right, double outlet, with long survival: case report (Khattri *et al.*). 569
— — rupture in acute myocarditis: case report (Stock & Lubbe). 135
— — endomyocardial fibrosis, clinical features (Somers *et al.*). 309
— — — severe haemodynamic features, including comparison with constrictive pericarditis (Somers *et al.*). 322
— — vascular pattern of myocardium (Farrer-Brown). 679
— work, and contractility (Hamer). 443
Vessels, great, complete transposition, double aortic arch associated with: case report (Higashino & Ruttenberg). 579
— — — — anatomical aspects (Lubkeiwicz & Jones). 872, *P.*
Volume, ventricular, left in aortic stenosis measured by an angiocardiographic and a thermodilution method (Fleming & Hamer). 475
— — right, end-systolic and end-diastolic, measurement by thermodilution technique (Balcon & Oram). 690

Waterston's operation (aorta to right pulmonary artery anastomosis) for cyanotic heart disease (Yacoub *et al.*). 423, *P.*
Wave amplitude relationships in the normal electrocardiogram (Michaels & Klovan). 412
Waveform changes, electrocardiographic, method for recording continuously (Neilson *et al.*). 872, *P.*
Wolff-Parkinson-White syndrome, aortic valve replacement in: case report (Richmond & Smith). 582
Work, cardiac, and contractility (Hamer). 443
